**Per Examiner's Amendments**

Claims 4, 9, 10, 14, 19, 20, 24, 29 and 30 are cancelled.

Claims 1, 2, 5-7, 11, 12, 15-17, 21, 22 and 25-27 are allowed.

**Response to Arguments**

**I.** Applicant's arguments (see Remarks pages 9-10) filed 9/17/2007, with respect to independent claims 1, 5, 11, 15, 21 and 25 been fully considered and are persuasive. Therefore the 35 USC 103(a) rejection of the pending claims has been withdrawn.

**Examiner's Amendment**

**II.** An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

**Cancel:** Claims 4, 9, 10, 14, 19, 20, 24, 29 and 30.

**Reasons for Allowance**

The following is an examiner's statement of reasons for allowance

IV. The prior art or record fails to teach neither singly nor in combination, the claimed limitations of “receiving a reservation request from a first peripheral device for a wireless communication session between the first peripheral device and the processor; receiving another reservation request from a second peripheral device for another wireless communication session between the second peripheral device and the processor; generating a schedule in response to the reservation request and the another reservation request, the schedule coordinating the wireless communication session during a first time window having a designated start time and a designated end time, the schedule coordinating the another wireless communication session to begin after the designated end time; wirelessly transmitting a multi-poll scheduling frame to the first peripheral device and the second peripheral device, the schedule encoded in the multi-poll scheduling frame; wirelessly exchange data with the first peripheral device during the first time window; wirelessly transmit a rescheduling frame in response to the wireless data exchange with the first peripheral device completing before the designated end time occurs, the rescheduling frame dynamically enabling the second peripheral device to begin the another wireless communication session before the designated end time, where the rescheduling frame is transmitted only if the data exchange with the first peripheral device is completed before the designated end time, and not transmitted at other times” as stated in independent Claims 1, 5, 11, 15, 21 and 25 (see Applicant's Specification, pages 7-9 and 12).

Specifically, the prior art fails to explicitly teach the claimed functionality for wirelessly exchanging data with the second peripheral device before the first time window ends pursuant to

Art Unit: 2141

the rescheduling frame, wherein the schedule provides for exchanging data with only the second peripheral device during a second time window, the second time window alternating with the first time window according to periodicity; wherein the processor encodes data about the periodicity in the multi-poll scheduling frame. These functions and limitations, in conjunction with other limitations in the independent and dependent claims, are not specifically disclosed or remotely suggested in the prior art of record.

A review of Claims 1, 2, 5-7, 11, 12, 15-17, 21, 22 and 25-27 in view of the Examiner's remarks above, indicates that Claims 1, 2, 5-7, 11, 12, 15-17, 21, 22 and 25-27 are allowable over the prior art of record. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
